Trinity Academy | English C | Maths C | Science B | IT B

CERTIFICATIONS

- Junior Penetration Testing Consultant Graduate Programme - August 2026
- EC-Council Certified Ethical Hacker Associate (v11) - August 2024
- CCNA Associate - July 2024
- CCNA Enterprise Networking, Security and Automation - July 2024
- DevNet Associate - July 2024
- CCNA Switching, Routing and Wireless Essentials - June 2023
- CCNA Introduction to Networks - April 2023

PROFESSIONAL SUMMARY

Cybersecurity professional with experience delivering external infrastructure, API, and authenticated and unauthenticated web application penetration testing assessments. Hands-on experience identifying, validating and reporting vulnerabilities, producing clear technical reports, and providing practical remediation guidance. Experienced in client communication throughout the assessment lifecycle, with a strong foundation in networking, enterprise IT and systems administration, supported by practical knowledge of OWASP methodologies, CVSS scoring and recognised security frameworks including NCSC, NIST and ISO 27001. Analytical, adaptable and committed to continued technical development within offensive security.

WORK HISTORY

Junior Cyber Security Consultant

09/2025 - 08/2026

Worknest Cyber Secure (Formerly Pentest People) - Leeds

- Completed a one-year fixed-term graduate programme focused on penetration testing and security consultancy.
- Conducted external infrastructure, web application and API assessments to identify and validate vulnerabilities.
- Produced technical reports explaining vulnerabilities, business risk and practical remediation actions.
- Managed client communication before, during and after assessments, including written updates, calls and debriefs.
- Adapted technical explanations for both technical and non-technical stakeholders.
- Managed difficult client interactions, risk disputes and severity/remediation concerns, escalating where appropriate.
- Conducted remediation checks and discussed accepted risk and verified remediation with clients.
- Adapted to scope changes, time-critical assessments and short-notice engagement changes.
- Contributed ideas for service improvement through personal project work and supported newer graduate consultants.

Second Line IT / Support Analyst

05/2024 - 11/2024

Blue Pool Computer Services Ltd - Doncaster

- Installed and maintained software and operating systems across customer environments.
- Prepared equipment for staff use and supported hardware, software and connectivity troubleshooting.
- Implemented IT solutions to improve operational efficiency and supported helpdesk operations.
- Monitored server health and handled sensitive data in line with confidentiality and availability requirements.
- Performed phishing tests to improve customer security awareness.
- Investigated technical issues and communicated complex concepts to users with varied technical knowledge.

DANIEL MARK JONES

CYBERSECURITY CONSULTANT

PENETRATION TESTING & SECURITY

- External infrastructure penetration testing
- Authenticated and unauthenticated web application penetration testing
- REST API and GraphQL security testing
- Vulnerability identification, validation and exploitation across network, web and API environments
- OWASP Top 10 familiarity across web and API testing
- CVSS v3.1 vulnerability risk assessment and scoring
- Entry-level O365 and internal penetration testing knowledge, including Active Directory environments
- Large Language Model penetration testing
- Email phishing and social engineering campaign experience

CLIENT CONSULTANCY & REPORTING

- Client-facing communication throughout penetration testing engagements
- Pre-assessment, scoping, kick-off and post-assessment debrief calls
- Clear practical vulnerability and remediation guidance in written and verbal formats
- Knowledge of Rules of Engagement, Statements of Work, Master Service Agreements and Service Level Agreements

NETWORKING & GENERAL IT

- Strong understanding of TCP/UDP protocols and common/uncommon network services
- Linux and Windows operating systems
- VMware, virtualised environments and containerisation
- Enterprise systems, server administration and infrastructure support
- Hardware/software troubleshooting and computer repair
- Python scripting and PowerShell knowledge

SECURITY STANDARDS & FRAMEWORKS

- OWASP penetration testing guidance
- NCSC cyber security guidance and best practice
- NIST cyber security guidance
- ISO/IEC 27001 information security principles
- MITRE ATT&CK framework awareness
- UK legal, regulatory and data protection considerations relevant to security testing

PROFESSIONAL SKILLS

- Technical troubleshooting and analytical problem solving
- Clear technical documentation and verbal communication
- Client and stakeholder communication
- Team collaboration and adaptability
- Effective escalation and risk management
- Confidentiality, integrity and availability awareness
- Time management and prioritisation across multiple engagements
- Continuous learning and development
- Ability to operate within a leadership capacity

ADDITIONAL WORK HISTORY

IT Lead / Duty Assistant Manager

06/2022 - 11/2023

General Survey - Scunthorpe

- Implemented software solutions and conducted system audits to identify potential security risks.
- Devised IT solutions based on departmental requirements and established IT usage and security procedures.
- Liaised with third-party vendors for hardware and software procurement and supported office operations.
- Acted in a leadership capacity when required and supported day-to-day management responsibilities.

Factory Operative

02/2021 - 04/2022

Yorkshire Pudding Factory - Doncaster

- Worked safely in a fast-paced production environment, operating machinery and supporting quality control.
- Managed stock and met production deadlines while maintaining operational standards.

Factory Operative

11/2020 - 01/2021

Next Distribution - Doncaster

- Worked within a fast-paced production line, consistently meeting targets and escalating equipment issues promptly.

Further past work history can be supplied on request. Employment gaps in this period were used to focus on undergraduate education.
